**OLM DESCRIPTION (INCLUDE REQUISITES):**

This course provides an introduction to programming using the Visual Basic language and its integrated development environment. Example applications are typical of what may be found in business or technical environment. Topics to be covered include the syntax and structure of the VB language; controls, dialog boxes, and other interface tools; menu design; multiple forms; error-tracking; and arrays. Other topics that may be covered include object linking and embedding (OLE); VB for applications; database development using record sets and database controls; data handling; grids; validations and elections; drag and drop; and graphics.
