COURSE DESCRIPTION (INCLUDE REQUISITES/RESTRICITIONS):
An introduction to the fundamental concepts and techniques of Computer Science. Students will learn to program using an object-oriented language. They will learn how to translate a real problem into a program description, and how to write and test a program to implement their description. The emphasis will be on developing a professional style at an elementary level. CS 160 will cover syntax as far as interacting classes, arrays of one dimension, and simple file I/O. Students with no programming background should instead consider CS 112. (Prerequisite MA 153)
