COURSE DESCRIPTION (INCLUDE REQUISES/RESTRICTIONS):

This course provides students with the opportunity to gain hands-on laboratory experience with several of the methods used to investigate neural functions. The course will begin with basic anatomy and physiology of the nervous system, and will finish with recent studies of the relation between sensory and cognitive functions.

Prerequisites: PSY 20300 with grade of C- or higher, and senior standing or 33 credits in psychology.

*COURSE LEARNING OUTCOMES:
- Understand basic anatomy and physiology of the nervous system.
- Understand complex behavior and cognition as products of neural activity.
- Understand the methods used to investigate neural processes.
