

In the 2009-10 reporting year, 1157 students graduated with a bachelor's degree. Graduates who attended Commencement were asked to complete a brief survey about their future plans, and the survey asked them to designate "What is most likely to be your principal activity upon graduation?" Some 363 new graduates provided responses to the survey, either at Commencement or when they picked up their diploma in the registrar's office in the next few weeks, which is a 31% response rate. The results of the survey are presented in the VSA College Portrait table. The survey population also included new graduates receiving certificates, associate degrees, and master's degrees. Survey results for these students are presented in the supplementary "Public Good" page 6 of the College Portrait.
